2021 Online Group Psychotherapy & Psychodrama Conference

April 7-11, 2021

100 Years of Psychodrama, Sociometry and Group Psychotherapy
Honoring Our Past & Visioning the Future

CEs – ASGPP: National Registry of Certified Group Psychotherapists, Counselors (NBCC); Ce-Classes.com: CEs for Psychologists (APA); Social Workers (ASWB); California and Texas Board Approvals; The Florida Board of Clinical Social Work, Marriage and Family Therapy and Mental Health Counseling

The entire conference (Wednesday - Sunday) offers up to 34 hours toward CEs.
ABOUT THE ASGPP

The American Society of Group Psychotherapy and Psychodrama was founded in April, 1942 by Dr. J. L. Moreno. In 1947, Dr. Moreno started the journal, *Group Psychotherapy*, which later became *The Journal of Psychodrama, Sociometry and Group Psychotherapy*, the first journal devoted to group psychotherapy in all its forms. ASGPP was the pioneer membership organization in group psychotherapy and continues to be a source of inspiration for ongoing developments in group psychotherapy, psychodrama and sociometry.

The purposes of the Society include fostering the national and international cooperation of those concerned with the theory and practice of psychodrama, sociometry, and group psychotherapy and promoting the spread and fruitful applications of the theories and methods of psychodrama, sociometry, and group psychotherapy in professional disciplines concerned with the well-being of individuals, groups, families and organizations.

The workshops will be offered by leaders from the US and countries around the globe, showcasing their work and the wide reach of psychodrama and sociometry in a variety of applications and settings both clinical and non-clinical. Workshops are for individuals who are interested in psychodrama and sociometry including social workers, professional counselors, psychologists, nurses, substance abuse counselors, creative arts therapists and other healthcare providers. Workshops are appropriate for beginning, intermediate and advanced level practitioners.

The learning objectives for the conference are for participants to:

1. Integrate psychodrama, sociometry and group psychotherapy into their clinical work.
2. Apply theories and methods of psychodrama, sociometry, and group psychotherapy in their professional discipline.

**SHAKING THE FAMILY TREE – WHO’S IN YOUR DNA?**

*Karen Carnabucci, LCSW, TEP, Private Practice, Lancaster, PA*

As DNA tests become more available, people are learning about new relationships in their family systems. Adoptees are finding biological parents and siblings; others are discovering startling family secrets including illegitimate and abandoned children and long-lost relatives. These discoveries shake us and force us to reevaluate how we fit into our social atom. In this workshop, we use psychodrama, mindfulness and Family Constellations to explore how we can tend to and integrate these new realities.

**Learning Objectives.**

After attending this workshop, participants will be able to:
1. Identify problems and distress that may surface with DNA results;
2. Demonstrate how psychodrama and Family Constellations principles can address personal and family distress.

**INTEGRATING MORENO’S METHODS INTO SOCIAL WORK (AND OTHER FIELDS)**

*Scott Giacomucci, DSW, LCSW, BCD, FAAETS, CP/PAT, Phoenix Center for Experiential Trauma Therapy; Mirmont Treatment Center; Bryn Mawr College*

If we are to spread psychodrama around the world or at least preserve its survival for the next generation, we must integrate it within other established professions such as social work, psychology, counseling, group therapy, and education. This workshop will highlight historical, theoretical, and practical similarities between psychodrama and social work practice/education. Furthermore, this workshop will present a process for integrating psychodrama into other fields and warm-up participants to doing so.

**Learning Objectives.**

After attending this workshop, participants will be able to:
1. Identify one theoretical overlap between social work and Moreno's methods;
2. Describe at least one way of integrating Moreno's methods into another field.

**GRACE, WISDOM & KINDNESS: A LEARNING COMMUNITY ON PSYCHODRAMA AND CLINICAL SUPERVISION**

*Catherine D. Nugent, LCPC, TEP, Laurel Psychodrama Training Institute; Johns Hopkins University*

Focus is the person of the supervisor, and becoming more conscious and intentional about how we are enacting the supervisor role. Dive deep into fundamental questions and cutting-edge knowledge about the role.

**DIALECTICAL BEHAVIORAL THERAPY IN ACTION: ENCOUNTER WITH THE WISE MIND**

*Rebecca Walters, LCAT, LMHC, TEP, Hudson Valley Psychodrama Institute*

The Wise Mind is central in Dialectical Behavior Therapy as well as a useful concept for those not trained in DBT. Our clients who lack positive nurturing role models often are challenged to engage their own inner Wise Mind. Participants will learn to use deep interviewing and role reversal to help people find, develop the role of, connect with and successfully engage the Wise Mind to move forward as well as participate in a full psychodrama.

**Learning Objectives.**

After attending this workshop, participants will be able to:

**MOTIVATIONAL INTERVIEWING MEETS PSYCHODRAMA**

*Jennifer Samblene, LCSW-R, CASAC, CDAC, TEP, Private Practice; Regina Sewell, LMHC, MEd, PhD, Russell Sage College, Dutchess Community College*

Psychodrama, Sociodrama and Sociometry are great adjuncts to motivational interviewing. They are particularly useful in cutting through rationalization, denial, justification and various other defenses that people use to avoid change. When you do things in action your body takes over and your mind gets out of the way. This workshop will show you how to use psychodrama to engage clients, help them identify and access resources, and work towards sustainable change.

**Learning Objectives.**

After attending this workshop, participants will be able to:
1. Define sociometry;
2. Describe how to incorporate two psychodramatic techniques into Motivational Interviewing.

The Power of Connection and Identification.

Floor Checks: Teaching and Healing Experientially
Research in neurobiology has made clear that our emotions are experienced and processed by the body as well as the mind and that healing from the kind of trauma that living with addiction engenders requires a mind/body approach. Psychodrama and sociometry allow the body to participate in the therapeutic milieu. In this experiential workshop we’ll look at how to use sociometry to explore issues related to trauma and addiction as well as to “warm up” a group, connect them with each other and their personal “stories”.

Learning Objectives.
After attending, participants will be able to:
1. Expand a restricted range of affect that can be the result of trauma;
2. Allow the group to become comfortable identifying, articulating and sharing emotion.

3:30 – 6:30 pm  3-hour workshops

AFTERNOON WORKSHOPS
**15 THE SOCIOMETRY OF COMPASSION: ACTION AND REFLECTION**

**Jacquie Siroka, LCSW, BCD, TEP, Sociometric Institute of New York, Integral Therapy, Psychodrama Institute of New York; Jaye Moyer, LCSW, TEP, Sociometric Institute of New York, Integral Therapy, Psychodrama Institute of New York**

The Benefactor practice helps us to recondition the negative narratives of who we think we are, so that we can access the deeper potential of who we really are. Benefactor moments occur between people all the time: our armor prevents us from noticing them or experiencing them in our bodies and hearts. The compassionate support of the Benefactor practice allows us to investigate difficult encounters with more ease and live with more authenticity and ease.

**Learning Objectives:**
- After attending this workshop, participants will be able to:
  1. Describe the “internal holding environment” and two conditions that develop and support it;
  2. Utilize one projective technique: The “Benefactor” Atom.

**16 ACTION APPROACHES TO EXPANDING SELF-AWARENESS IN CLINICAL SUPERVISION**

**John Sherry, PhD, University of Northern British Columbia**

This workshop will focus on the importance of self-reflection in our clinical work with an emphasis on the way in which our own attachment style affects our clinical work as clinicians and supervisors. A variety of creative, experiential and psychodrama activities, group process, writing exercises and other creative approaches focused on moving supervisees from content to process will be discussed and demonstrated.

**Learning Objectives:**
- After attending this workshop, participants will be able to:
  1. Recognize their own attachment style and how it influences their work as clinicians and clinical supervisors;
  2. Demonstrate a variety of interactive, experiential clinical supervision approaches to address supervisees’ attachment style.

**John Skandalis, LMHC, TEP, Private Practice**

The theme of the workshop is healing aspects of the inner child using psychodrama and corrective parenting techniques. We will be warming up as a group and warming up to aspects of the inner child that need healing: A corrective experience around being parented so they receive the structure, meaning making or nurture that was missing in their childhoods. We will enact personal stories and enroll workshop members to play healthy parent roles followed by sharing and processing of the work done.

- After attending this workshop, participants will be able to:
  1. Recognize that the strong emotions they can have are often about their inner child. And that they can interact with the inner child using psychodrama to meet that parts unmet needs;
  2. Describe their three interior ego states: child, adult and parent egos, and how to create a healthier parent ego in them to help the neglected and hurt child within.

**Paul Lesnik, CSCSW, TEP, ASGPP, CSCSW, ABE; Lin Considine, LMHC, TEP, ASGPP, CSCSW, ABE**

Clients often re-create scenes from their past that bring “drama” into their present life. These scenes are often deep-rooted and often unconscious. The action methods of psychodrama offer many opportunities to set scenes to explore the stories that create our lives and move these stories toward an alternative ending. Workshop participants will explore these opportunities in action.

**Learning Objectives:**
- After attending this workshop, participants will be able to:
  1. Identify 2 or more ways that sense memory and other triggers are explored in psychodrama, complementary expressive arts and evidence-based modalities;

23  USING THERAPEUTIC SPIRAL MODEL (TSM) IN NON-CLINICAL SETTINGS *

Joshua S. Lee, MSW, CP/PAT, World Business & Executive Coach Summit (WB ECS)
TSM defines trauma as any event that overwhelms our coping abilities. When people are stuck in life, underneath their narrative about what is going on, is oftentimes, a trauma “story” that leaves them yearning for more out of life. TSM can help sort out those stories. By looking at one’s behavior through the lens of performance – effective or not effective – will allow people to uncover where they may be stuck in life and talk about it more openly (and even with a sense of fun and play). The framework we will be using to work with “less” traumatic material is called The Game Plan®. It is a non-threatening experiential model that uses the language and metaphor of sports to explore and inquire into one’s performance in an easy, yet insightful way. No sports background needed.

Learning Objectives:
After attending this workshop, participants will be able to:
1. Apply strengths and resources to help them overcome their opponents;
2. Distinguish their story narrative from past-based to a generative one in order to transform it.

Sociatry and Social Justice Panel

The Sociatry and Social Justice Panel is a format that will happen regularly throughout the year to let membership know what other members are doing in the field of Social Justice. This 3-hour workshop will highlight core concepts of creativity and spontaneity through a sequence of activities that magnify therapeutic results physically, emotionally, and cognitively. Combining lecture and demonstration, participants will have the opportunity to explore approaches from drama therapy, storytelling, and mandala drawing. This multimodal, integrated approach can be used with a variety of populations across the lifespan. Together we will consider how participants can incorporate these techniques into the work they are currently doing to facilitate maximum transformation in treatment with their clients. No previous experience in any of these disciplines is required.

Learning Objectives.
After attending this workshop, participants will be able to:
1. Identify the psychodrama concepts of creativity and spontaneity in other expressive therapy approaches by integrating body movement, art making, and role playing/drama;
2. Apply sociometry nonverbally in expressive group therapy.

TIMELESS WISDOM FROM THE EMPTY CHAIR. FINDING HOPE AND JOY

Anath Garber, TEP, PDD, Institute of Applied Human Relations

“The world is a narrow bridge and the most important thing is not to be afraid at all.” Be joyful! (Rabbi Nahman). Both J.L. Moreno and Rabbi Nahman, the 18th century mystic who translated the intricate kabalistic writings into healing techniques promoting joy, utilized the empty chair. We will compare Moreno’s “Theater of Truth” with Rabbi Nahman’s practical wisdom as ways to find joy. This workshop will contain a full psychodrama.

Learning Objectives:
After attending this workshop, participants will be able to:
1. Describe Moreno’s Empty Chair and Rav Nahman’s Empty Chair;
2. Demonstrate at least one technique for pursuing joy and peace of mind.

TSM PSYCHODRAMA: SAFETY AND STRENGTHS FOR GROWTH

Dr. Ina Hogenboom, MSc, NIP A&O, Trainer, Board of examiners for CP & TEP (NBES), Dutch Associations for Psychologists (NIP, NVPA), Associations of psychotherapy modalities (NAP, VMP)

This workshop presents the TSM safety structures in a playful and experiential manner. Come prepared to be active in your body and be open to spontaneous fun. The Therapeutic Spiral Model (TSM) is an experiential therapy to treat trauma and promote post-traumatic growth. TSM is based, among other things, on psychodrama, attachment theory and recent neuroscience findings. Learn to work actively and creatively with safety through strengths, containment and sociometric structures and learn how to increase the group’s spontaneity that can lead to post-traumatic growth.

Learning Objectives:
After attending this workshop, participants will be able to:
1. Apply TSM safety structures in their own therapeutic practice;
2. Identify ways to hold a protagonist within their window of tolerance for healing and change.

FROM ANXIETY THROUGH PSYCHODRAMA TO SPONTANEITY

Galabina Tarashoeva, MD, PhD, Psychodrama Center & Psychiatric Practice Orpheus, Sofia, Bulgaria, Medical University Sofia, department of Psychiatry

The results of our research “Some aspects of effectiveness of psychodrama therapy with patients with panic disorder” show that psychodrama is an effective method for reduction of anxiety and increase of spontaneity; and these effects continue for 6 months after completing the course of treatment. We found significant in strength and a statistically significant negative correlation between changes in spontaneity and anxiety values for all subjects. Increased spontaneity was also associated with an increase in mental well-being.

Learning Objectives:
After attending this workshop, participants will be able to:
1. Describe correlations between anxiety and spontaneity;
2. Explain why psychodrama is an effective method for therapy with patients with panic disorder.

THE GENOGRAM IN ACTION: ANCESTRAL PSYCHODRAMA

Judy Swallow, MA, LCAT, TEP, Hudson Valley Psychodrama Institute

Ancestral psychodrama gives group members the chance to experience the struggles and triumphs of early family members, and can help them clear out unfinished business that has left lingering imprints which impact current descendants and may affect future generations. Participants will learn and practice this use of extended role reversal as a way of healing energy blocks.

Learning Objectives:
After attending this workshop, participants will be able to:
1. Differentiate between ancestral psychodrama and traditional psychodrama;
2. Demonstrate the use of expanded role reversal to better understand familial influences.
CHILDWORK/CHILDPLAY:
ACTION METHODS WITH CHILDREN

Rebecca Walters, LCAT, LMHC, TEP, Hudson Valley Psychodrama Institute

Psychodrama, sociodrama and playback facilitate the healing of wounded children. This workshop will focus on group work with children, ages five through twelve, who are victims of abandonment, abuse, trauma and domestic violence. Specific action structures that allow children to tell their stories, express strong feeling and find new roles will be demonstrated including the psychodramatic and sociodramatic empty chair, multiple doubles, the inner and outer circle and the use of fantasy figures and superheroes.

Learning Objectives.
After attending this workshop, participants will be able to:
1. Distinguish between appropriate use of psychodrama versus sociodrama;
2. Identify and describe three action structures that may be used with children.

TRANSFORMING ADDICTIVE PROCESSES:
SHOWCASING THE EMPTY CHAIR

Shelley Korshak Firestone, MD, University of Chicago Department of Psychiatry, Chicago Psychotherapy & Psychiatry

This workshop presents the cutting edge model of treatment for addictions, trauma, and a range of impulsive, compulsive and other mental health problems. Showcasing the use of the empty chair, we demonstrate five basic roles operative in all our relationships, revealing the secrets of the addict within.

Learning Objectives.
After attending this workshop, participants will be able to:
1. Define addictive and dysfunctional processes as relational disorders, recognizing the preference for engaging in unhealthy or addictive behaviors over engaging with people, and appreciate the importance of trust and belonging in the recovery process;
2. Apply the technology of the empty chair and other action techniques to the treatment of addictions, trauma, and a range of impulsive, compulsive and other mental health problems.

CO-CREATION AND CONNECTION IN A TIME OF DISCONNECTION

Valerie Simon, LCSW, CET II, TEP, The Inner Stage

We will explore what blocks us from connecting with others in our spontaneity and creativity. After a warm-up we will have a didactic piece about the Canon of Creativity. Through walking the Canon we will explore areas that we can become stuck in cultural conserves, as well as social or emotional ones. A short psychodrama will be conducted followed by sharing and processing.

Learning Objectives.
After attending this workshop, participants will be able to:
1. Identify one block in his/her/their spontaneity and creativity;
2. Recognize one way to increase spontaneity and creativity by utilizing the Canon of Creativity.

Social Justice
The Social Microscope

“Human society has an actual, dynamic, central structure underlying and determining all of its peripheral and formal groupings.” “It exerts a determining influence upon every sphere in which the factor of human interrelations is an active agent.” “Its existence can be brought into an empirical test by means of social microscopy.” “There is a primordial nature, which is immortal, a first universe which contains all beings.” J.L. Moreno

The Social Microscope, a social justice action tool, is embedded within the writings of J.L. and Zerka Moreno. After two decades of research and practice, the Social Microscope is ready to be shared, to show in action the underlying structure of society, to help to heal the fabric of our culture. The Social Microscope – education and training – is available to individuals, groups, and organizations, as a mentored program of basic ideas and action learning.
